## VOLUNTEER INFORMATION

Your energy and enthusiasm are most welcome!

Volunteers participate within their own capacity – all efforts are appreciated!

FoSEPP volunteers complement the work of DEW staff in protecting, preserving and conserving the natural environment of Lincoln National Park.

Tasks include the following –

- Walking trail and campsite maintenance
- Weed control (spraying, pulling and monitoring weeds)
- Revegetation (seed collection, propagation, planting seedlings)
- Monitoring threatened species
- Beach clean-ups
- Environmental education and awareness – brochures, signage, displays.

Other tasks can also arise where volunteers' experience, expertise and skills can be readily utilised ie grant submissions, event planning and promotion.

From time to time, small grants allow FOSEPP to make a contribution towards volunteers' fuel costs and some small items. Otherwise, volunteers contribute their time, money and effort towards the enhancement of the Park's amenity.

Volunteers work as teams, in pairs or individually with DEW staff (monthly working bees and quarterly trail maintenance work). When volunteers work alone, they are required to advise the DEW Duty Ranger of their expected arrival and departure times as well as their destination in the Park.

Check out our Facebook page to see what we've been doing lately.
