

Existing videos on the Natural Resources Adelaide & Mt Lofty Ranges Youtube channel

<https://www.youtube.com/user/amlrnrboard/>

In April 2020, the NRAMLR Volunteer Support Program sought feedback from volunteers re what videos and resources they would find useful to keep engaged during the Covid-19 period. A summary of relevant existing videos were then selected and provided below. As well, a number of new videos were developed in response to volunteer requests.

Title and weblink	Overview	Run time (minutes)	Date produced
Weed identification and control information*			
*Please note that some methods mentioned in the videos may not be suitable within good quality habitat. If in doubt of the best approach at your volunteer site seek advice.			
Weed info: How to control Gazania https://www.youtube.com/watch?v=aYSx88aYkYA	Corey Jackson looks at methods to remove Gazania along the coast, including manual pulling, grubbing and chemical control.	8:24	2013
Weed info: How to control Gorse https://www.youtube.com/watch?v=8mcqGsLIVWM	Andy Raymond demonstrates how to remove Gorse manually, via spraying, cut & swab, and with biological control.	10:57	2012
Weed info: How to control Blackberry https://www.youtube.com/watch?v=FyUsVhx_tI4	James Donnelly looks at spraying, grubbing and cut & swab methods to remove Blackberry.	6:08	2012
Weed info: How to control Caltrop https://www.youtube.com/watch?v=GQ0fxQA_bpY	James Donnelly looks at spraying and grubbing of Caltrop.	4:12	2012
Weed info: How to control Broom https://www.youtube.com/watch?v=GudI7cDyxf0	Jess Mitchel & Andy Raymond compare Cape & English Broom to <i>Pultenea daphnoides</i> and discuss manual, mechanical and chemical removal, as well as using biological control methods.	11:03	2012
Weed info: How to control Bridal creeper https://www.youtube.com/watch?v=Bg1Dx23NdQI	Jess Mitchell discusses removing Bridal Creeper using mattocks, wiping with chemical, spraying, and bio-control; plus a short case study from Friends of Newland Head Conservation Park.	14:53	2012
Weed info: How to control Olive https://www.youtube.com/watch?v=H3VV8sK-lcA	James Donnelly demonstrates olive removal via manual methods, and chemical methods such as cut & swab, drill & fill and filling.	8:46	2012
Using the basal bark method for the control of Olive https://www.youtube.com/watch?v=5-N_4qUVJ9w	Julian Marchant & David Hughes demonstrate the basal bark method for controlling Olives.	6:32	2015
Weed info: How to control Cape Tulip https://www.youtube.com/watch?v=o-t7tVhpVfQ	James Donnelly looks at grubbing, wiping, and spraying of Cape Tulip	6:21	2012

Weed info: How to control Willow https://www.youtube.com/watch?v=fAYDIu50FY8	Andy Raymond demonstrates removing Willow via manual methods, spraying, stem injection, drill & fill, and cut +& swab.	8:59	2012
Handling Chemicals https://www.youtube.com/watch?v=qKE-tWIHB7c	Steve Donnelly looks at handling chemicals (including herbicides) safety.	4:49	2012
Showcase of other Landcare groups			
Friends of Scott Creek https://www.youtube.com/watch?v=dD0QClh_mH8	A look at Friends of Scott Creek Conservation Park's weed control work and some of the history of the site. Looks at founding member Enid Robertston's use of the Bradley method (bushcare control methods working on the best quality habitat first) and their success over the years. Discusses their use of Crowd funding to get money to employ contractors.	8:52	2018
Williamston & Lyndoch Landcare Group https://www.youtube.com/watch?v=lDe7hJc4Mxw	A look at the Williamston & Lyndoch Landcare Group's work with creek restoration, establishing a green corridor, pest control and purchase of the Altona site.	4:26	2013
Campbelltown Landcare Group https://www.youtube.com/watch?v=iDT4NYBrbKc	Information on the Campbelltown Landcare Group, which established in 1994 to enhance biodiversity in the area, in particular Wadmore Park. Shows changes over the years and their role in education.	4:37	2013
Sturt Upper Reaches Landcare Group https://www.youtube.com/watch?v=lwUjs_cVe-l	A look at the work of Sturt Upper Reaches Landcare Group over the last 20+ years in revegetating a blackberry infested site strategically to ensure the Southern Brown Bandicoot in the area are protected.	3:34	2013
Kersbrook Landcare Group https://www.youtube.com/watch?v=hInvGUCHF7U&t=15s	A look at Kersbrook Landcare Group's activities at Warren Conservation Park, their nursery and helping with goat eradication since 1997.	4:03	2013
Watercourses			
What are environmental flows? https://www.youtube.com/watch?v=BLEA1l0IH3w	An introduction to environmental flows	2:36	2013
Watercourse restoration https://www.youtube.com/watch?v=nLzEBOJBnZk	Landholder strategies for restoring watercourses including stock exclusion, revegetation, and other remedial activities.	5:14	2020
Erosion control case study of creek – Yankalilla https://www.youtube.com/watch?v=DbI3CtPch7M	A case study on bank battering and rock placement to stabilize watercourses. *Please note this method may not be suitable within good quality riparian habitat. Permissions and advice are required for this method.	5:54	2014
